Keeping it Green...

The green issue is always at the forefront of our minds. That is the one area where we don't see any reason for choice... It simply has to be.

The Samba range reflects this stance with all snack machines, having fully-insulated cabinets and double glazed windows, to minimise heat transfer and energy saving facilities that reduce energy consumption. They are produced to ISO14001 and all materials used in the

manufacturing process conform to the Restriction of Hazardous Substances Regulations. Packaging materials used in transportation conform to the Packaging (Essential Requirements) Regulations 2003.

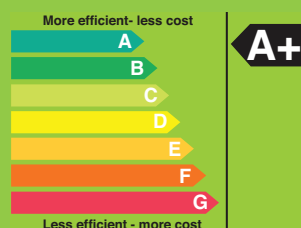

The Samba has achieved the industry-leading A+ Energy rating, exceeding the standard set by the European Vending Association (EVA). It has also

been awarded the 2008 Auto Vending Innovation Award for best in 'Machine Intelligence'.

At N&W, we adhere to a stringent environmental management system and undertake life cycle assessments for all of our machines. Our awards include 'Best Sustainability Award' (Avex 2007) and 'Best Sustainable Development & the Environment' (Vending Paris, 2008).

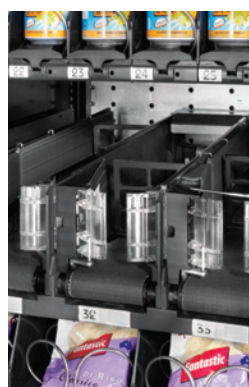

Energy consumption

For each stand-by hour	212WH
Yearly Consumption (KW/h) Calculated on the EVA/EMP Idle Mode	1,778 KW/h
Estimated Carbon Emissions Kg per annum	208
Estimated CO ₂ Emissions Kg per annum	765

Features

Dimensions (HxWxD)	1830 x 890 x 860 mm Depth with simple removal of vend bin - 793 mm Overall depth with door open - 1495 mm
Weight	280 kg

The Samba

The Samba range has been designed to provide the most flexible of energy-efficient snack machines, enabling a full range of products to be vended rather than just traditional items. Thanks to our new multimax trays, whatever fits through the gate can now be vended giving your customers the added luxury of choice.

- Large LCD graphic display
- Tiltable trays for better access to fill the machine
- Patented directional LED lighting
- Easy movability through 800mm doors and simple removal of delivery bin
- Infra red detection system for guaranteed product delivery
- Transmission and collection of statistics according to EVA DTS protocol
- Rolling price display for simplified price change operations
- Internal storage
- Optional 'hot' buttons
- Optional video screen showing promotional messages
